Helen Zhang (she, her, hers)
Sports Injury Epidemiologist at IQVIA

Hi, I'm Helen! I work in sports injury epidemiology with the NFL and NBA at IQVIA and I'm currently pursuing my master's in data science at Johns Hopkins. I studied biostatistics at UNC–Chapel Hill (go Heels!) and love using data to uncover patterns that help medical staff keep athletes healthy. In my free time, I'm usually traveling, trying new restaurants, with my family or friends, or hanging out with my dog, BaoBao.
